

# SPOTLIGHT ON:

## Franklite - Celebrating 40 years in MK

Franklite Limited is now in its 40th year and is still one of the most respected lighting companies in the country. With a reputation for quality of product and service, the company offers its lighting products through Approved Retailers countrywide and exports are also on the rise.

In 2004, after many requests from visitors to the lighting showroom, Franklite opened a Factory Shop on Winterhill selling discontinued lines, slight seconds, and original samples. The shop has one of the largest displays of lighting in the area, and offers discounts between 40% and 70%.

The factory shop staff, Chris and Ian, have both been in the lighting industry for over 20 years and therefore can offer help and advice on

suitability of product and light source. Now that the EU have banned further sales of traditional tungsten lamps (once current stocks have gone) it is ever more complicated to adequately light a room and there are few places in Milton Keynes that can offer this service.

There is a huge selection and variety of lighting in the shop and always a warm welcome – why not drop by and have a look around. *(Advertising Feature)*
